INDEX TO VOLUME XIII

Burchnall, J. L. Differential equations associated with hypergeometric functions 90

Chaundy, T. W. Expansions of hypergeometric functions . 159

Davies, E. T. The first and second variations of the volume integral in Riemannian space 58

Erdélyi, A. Integral equations for Heun functions . . . 107

Guinand, A. P. Summation formulae and self-reciprocal functions (III) 30

—— Simple Fourier transformations 153

Hamburger, H. L. Contributions to the theory of closed Hermitian transformations of deficiency-index (m, m) . . . 117

Hua, Loo-Keng. The lattice-points in a circle 18

Jackson, F. H. On basic double hypergeometric functions. . 69

Kendall, D. G. A summation formula associated with finite trigonometric integrals 172

MacRobert, T. M. Some integrals involving E-functions and confluent hypergeometric functions 65

Mayer, A. E. A mean-value theorem concerning Farey series . 48

—— On neighbours of higher degree in Farey series . . . 185

Mohan, B. Infinite integrals involving Struve's functions . . 40

Rado, R. A theorem on independence relations 83

Titchmarsh, E. C. An eigenfunction problem occurring in quantum mechanics 1

—— On the order of $\zeta(\frac{1}{2}+it)$ 11

—— Some problems in the analytic theory of numbers . . 129

Vijayaraghavan, T. On functions represented by certain series . 113
